Dr. Joshua Lederberg  
Department of Genetics  
Stanford University Medical School  
Stanford, California 94305

Dear Dr. Lederberg:

I am writing to follow-up our recent conversation concerning your participation in a small working conference of about 35 people sponsored by the National Institute of Environmental Health Sciences of the National Institutes of Health. It is expected that statisticians, epidemiologists, and biologists will be considering the "Statistical Problems in Developing Procedures for Estimating Risks to Man from the Results of Animal Experiments." Our major concerns are with the statistical and biological problems of relating animal carcinogenesis data to human risk assessment. I would very much like to invite you, as a guest of NIEHS, to participate in this conference.

The Conference is planned for September 30 through noon on October 2 at Wrightsville Beach, North Carolina which is a seaside resort about 2 hours flying time from either New York or Washington, D. C. NIEHS would, of course, pay your transportation and other expenses.

If you would like further details, please contact me and also, if you would send me your travel plans, your reservations and tickets will be taken care of by our Travel Office.

Sincerely yours,

  
David P. Rall, M.D., Ph.D.  
Director
